

## **Lesson 1.4 The Browse by Subject Search**

The third option is the browse by subject and this is quite interesting if you just want to have a general look or get an overview of the economic activity in the EU or EU activity beyond. The three overview categories are business opportunity i.e. stage of the procedure and notice type. This might be if you want to see the status of a procedure or the general volume of activity at each stage, business sector, browsing by CPV code, category of goods, works or services, place of performance, what is being requested for which region.

All of these categories provide interesting information and the results can be further filtered by the fields on the left hand side.
